

# Paper Plane

## Instructions

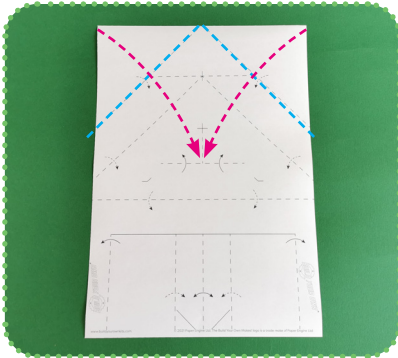

- Printer
- x1 A4 sheets of paper
- Colour pens to add your own designs
- Space for the plane to fly
- Print out plane sheet at 100%

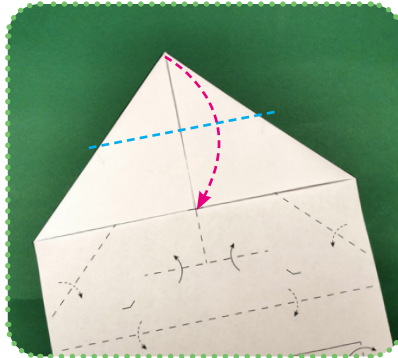

Learn how to fold this fantastic flying plane!

How far will your plane fly?

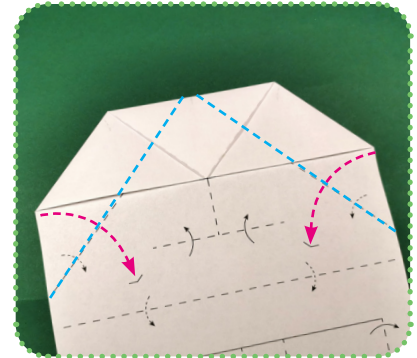

**1.** Fold the top two corners towards the centre until they meet the cross.

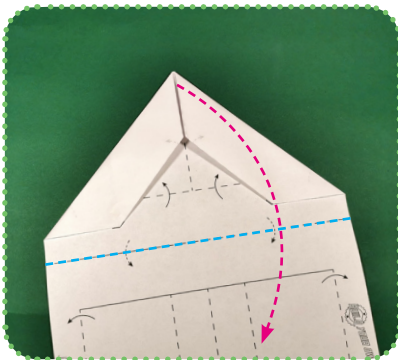

**2.** Fold the top centre corner down to meet at the same guide cross.

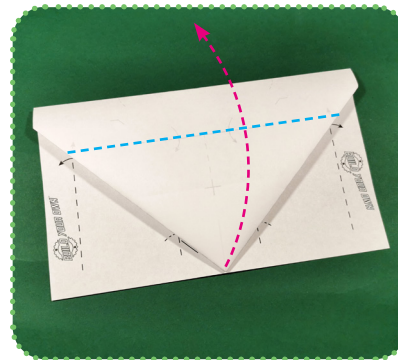

**3.** Fold the top two edges inwards, to meet the cross and the guides corners.

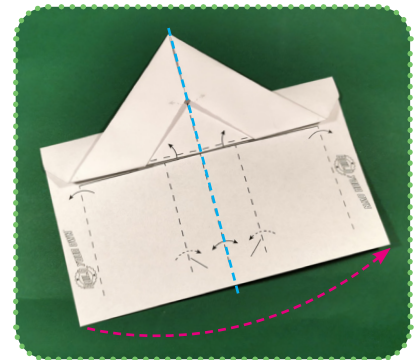

**4.** Fold the top corner to the bottom edge, to meet the lower corner guide.

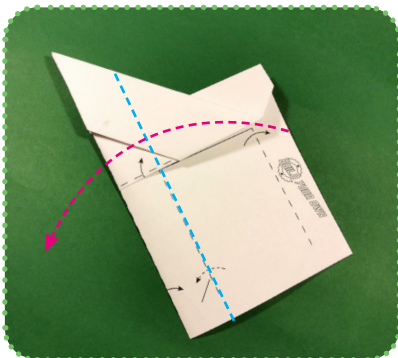

**5.** Fold the same corner back up, using the black dotted line as a crease guide.

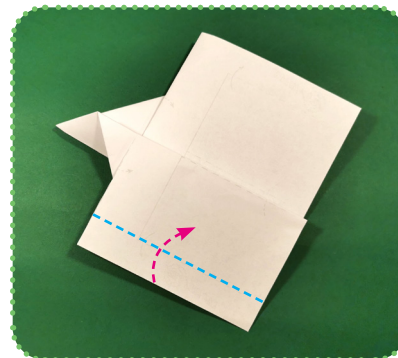

**6.** Fold the plane in half. Making sure you can see the graphics on the outside.

**7.** Fold back one wing of the plane, using the dotted line as a crease guide.

**8.** Fold the same wing up and back onto itself. Using the crease guide.

**9.** Repeat steps 7 & 8 for the other wing. Well done, you've finished!
